

Senthil Sundaramurthi

SENIOR DATA ENGINEER

✉ senthil1115@gmail.com | 📧 [senthilsundar](#) | 🌐 [senthil-sundaramurthi-12b32012](#) | 📍 London, UK

Senior Data Engineer with 10+ years of experience modernising data platforms, building cloud-native ELT pipelines, and delivering governed BI solutions. Specialised in GCP, BigQuery, dbt, Snowflake, Airflow, Python, and SQL, with demonstrated success reducing transformation runtimes by 60%, improving pipeline reliability, and enabling self-service analytics across global teams. Experienced in data modelling, CI/CD, stakeholder management, and mentoring engineers and analysts.

Work Experience

Choreograph | WPP Media

London, UK

SENIOR DATA ENGINEER

Aug. 2021 — Current

- Modernised legacy ELT pipelines using dbt, implementing modular models, automated testing, source documentation, exposures, and reusable transformation patterns.
- Built containerised dbt pipelines and deployed them through Cloud Run, improving deployment efficiency and scalability.
- Orchestrated end-to-end dbt workflows using Airflow across BigQuery and Cloud Run, reducing manual monitoring and improving pipeline reliability and operational visibility.
- Managing compliance strategy and execution, embedding controls, evidence capture, and continuous monitoring
- Developed federated queries and incremental models that reduced transformation runtimes by 60%.
- Led the development of a quality dashboard used by 30 stakeholders across global teams, combining Power BI with BigQuery and automated refreshes.
- Introduced version-controlled analytics engineering practices, including code reviews, CI/CD integration, testing, and documentation, helping reduce production incidents.
- Partnered with analysts, data scientists, and business stakeholders across more than 15 teams to deliver governed dashboards and analytical solutions.
- Mentored five junior engineers, analysts, and cross-functional team members in data modelling, dbt, dashboard design, code reviews, and CI/CD practices.

Outra | Papa John's Pizza

London, UK

DATA WAREHOUSE ENGINEER

Jul. 2020 — Sep. 2021

- Migrated legacy Talend pipelines to Talend Data Management Platform, improving pipeline efficiency, monitoring, and maintainability.
- Developed a unified Single Customer View using identity resolution across multiple source systems.
- Implemented secure, reusable data integration workflows in Talend Cloud using dynamic contexts and environment-specific configurations.

Reed Online | Recruitment

London, UK

DATA ENGINEER

Mar. 2019 — Jun. 2020

- Built Salesforce and API-based ingestion pipelines into Snowflake to support governed reporting and analytics in Looker.
- Developed data ingestion workflows using GCP Dataflow and AWS services to support machine-learning pipelines and real-time scoring.
- Enabled self-service analytics through Looker models with governed layers, reusable dimensions, and row-level security.

Capita Plc | Consultancy

London, UK

BI DEVELOPER

Sep. 2015 - Mar. 2019

- Delivered SSIS, SSRS, and SSAS solutions across finance and workforce reporting domains.
- Designed dimensional models, data marts, and ETL audit frameworks to improve data quality, traceability, and lineage visibility.
- Worked with business stakeholders to translate reporting requirements into reliable BI solutions.

CLCH | NHS Trust

London, UK

BI DEVELOPER

Oct 2013 - Sep. 2015

- Built healthcare ETL pipelines using SSIS, integrating flat files, XML, Excel, and other operational data sources.
- Developed OLAP models and star schemas that improved query performance for clinical reporting.
- Supported data quality, reporting accuracy, and consistent delivery of management information.

Education

University of Bedfordshire

Bedfordshire, UK

MSC COMPUTER SCIENCE

Oct. 2009 - May 2011

- Coursework:** Emerging Technology, Network Administration and Management, PRINCE2 Project Management, Secure Data Communication, Grid Technology and Project Management

Anna University

Chennai, India

B ENG. ELECTRONICS AND COMMUNICATION ENGINEERING

Oct. 2003 - Sep. 2006

- Coursework:** Object-Oriented Programming, Programming and Data Structure, Computer Architecture, Project Management, Web Technologies

Skills

Cloud and data platforms:

GCP, BigQuery, Dataflow, Pub/Sub, Cloud Run, Snowflake, AWS, Azure

Data engineering:

dbt, Dataform, Talend, Talend Cloud, SSIS, Apache Spark, Hadoop, ETL/ELT

Programming and analytics:

SQL, Python, Pandas, NumPy, DAX

Business intelligence:

Power BI, Looker, LookML, Tableau, Looker Studio

Orchestration and DevOps:

Airflow, Docker, Terraform, GitHub, CI/CD

Data modelling:

Dimensional modelling, Star Schemas, Snowflake Schemas, Data Marts, Data Lineage, Audit Frameworks
